

### Megacode with Roles and Skills

This manikin has a high quality look and feel. Even with a focus on team roles the correct skills feedback continues. It provides realistic feel for interaction of air pressures during skills performance.

#### Quality of Code Roles

##### TEAM WORK

Practice team work so that each team member knows what to do and how to work with other team members. See that Critical Events are performed at the correct time.

#### Quality of Skills

##### FEEDBACK

The high quality manikin provides excellent physical feel and it provides real time feedback on skills as they are performed. The quality of skills is reported later in relation to the roles performed.

#### Physical and Digital Feel

This proprietary feature means that you feel the air flow and air pressure as the chest compressions and ventilations interact. This improved realism helps students understand why quality performance in CPR is so important.

#### Debriefing

##### POINTS TO IMPROVE

The report identifies specific areas where the megacode could be improved in order to improve the condition of the patient. This objective data points to how each person in the megacode could improve.

Designed to give you the flexibility to run the code the way you want. It keeps track of key events. It displays and reports on the quality of skills performed both in real time and in the debriefing report.
